

E-COMMERCE SALES PERFORMANCE REVIEW

Executive Business Report | January – June 2026

Prepared for Management Review

The Bottom Line

Six months of trading, at a glance

₹27.62M

TOTAL REVENUE

1,000

TOTAL ORDERS

3,035

UNITS SOLD

₹27.6K

AVG ORDER VALUE

● WHAT'S WORKING

Electronics — Laptop, Tablet, Smartphone — carries the business, driving 78% of all revenue.

● WHAT'S NOT WORKING

Revenue fell 22% from May to June, the sharpest drop of the year; 88% of revenue relies on just 5 products.

● WHAT TO DO NEXT

Find out why June dropped, diversify beyond the top 5 products, and invest in underperforming cities.

Revenue & Sales Trend

A sharp June decline is the single most urgent signal in this data

-22%

May → June revenue drop

January peak: ₹5.21M

June low: ₹3.81M

Spring: steady, ~₹4.6M–4.9M

Priority: confirm whether this is a data issue, a stock issue, or real demand softening before Q3 planning.

Where the Revenue Comes From

Electronics dominates — a strength and a concentration risk at once

Category	Share	Status
Electronics	78.2%	Core revenue driver
Home Appliances	11.4%	Stable, secondary
Accessories	5.9%	High volume, low value
Fashion	4.2%	High volume, low value
Books	0.3%	Negligible — review

Product Concentration Risk

Just 5 products generate roughly 88% of total revenue

41%

of total company revenue comes from Laptop alone

Laptop, Tablet, and Smartphone together generate ~75% of revenue. A stockout, price war, or demand dip in any one of these would hit the business hard.

City Performance

Hyderabad and Ahmedabad trail the leading cities by 35–40%

What This Means for the Business

Revenue depends on price, not volume

Selling more units barely moves revenue. Prioritize high-ticket products in marketing and inventory strategy over pushing unit volume.

The business is over-reliant on 5 SKUs

88% of revenue sits in Laptop, Tablet, Smartphone, Air Fryer, and Watch. Any disruption to these is a direct threat to revenue.

June's drop needs an explanation

A 22% month-over-month decline is too large to ignore — rule out data issues and stockouts before setting Q3 targets.

Recommendations

Six priorities for the next quarter

1

Investigate the June revenue drop immediately

Rule out data issues and stockouts first, then check marketing spend and demand.

2

Build a stronger second tier of products

Promote Coffee Maker, Mixer, Shoes, Jeans, Backpack to reduce top-5 dependence.

3

Bundle low-value categories with high-value ones

Pair Fashion and Accessories with Electronics purchases to lift order value.

4

Invest in Hyderabad and Ahmedabad

Audit delivery speed, local marketing, and payment options.

5

Reassess the Books category

At 0.3% of revenue, decide whether it merits continued investment.

6

Set up early-warning tracking

Monitor month-over-month revenue with a threshold alert for early detection.

Bottom Line for Leadership

The business is healthy in aggregate — ₹27.62M in six months — but that strength rests on a narrow base.

Understand why June fell off a cliff

Reduce dependence on a handful of Electronics products
